

THE ARC3 DIFFERENCE

100 Years Strong. Locally Driven.

Arc3 Gases is an independent, family-owned distributor of industrial, medical, beverage, and specialty gases—cylinder, microbulk, and bulk—as well as welding and cutting products and equipment, metalworking equipment, safety products, dry ice, and industrial supplies.

We support essential industries—including manufacturing, metal fabrication, healthcare, universities, and food and beverage—by delivering the products and technical competence they depend on to operate safely, efficiently, and competitively. Our responsiveness and reliable supply give customers confidence that their operations will not be disrupted. Through trusted guidance and long-term partnerships, we help customers strengthen their businesses and grow with confidence.

60+ Branches • 6 Gas Filling Facilities • Bulk Gas Delivery

INDUSTRIAL GASES

WELDING SUPPLIES

Your Source for Gases, Equipment, & Support

Arc3 Gases delivers the gases, gear, and knowledge which professionals rely on to keep operations running. With an online store, extensive branch network, local inventory, and dedicated support—including equipment repair and on-site service—we make it easy to get what you need, when and where you need it.

Visit arc3gases.com or call 844.272.3427 to connect with your local team.

BRANDS WE TRUST

OUR GASES

Precision. Purity. Performance.

We produce and distribute gases for industrial, medical, specialty, and beverage applications in cylinders, dewars, microbulk, and bulk packages. Backed by local infrastructure, responsive teams, and a commitment to safety, our gases are produced and delivered with consistent quality you can count on.

Industrial & Welding Gases

We provide a full range of gases in high-pressure cylinders, liquid dewars, microbulk, and bulk packages to metal fabricators, manufacturers, farms, and job sites of all sizes. Whether you're a small shop or a large, multi-site operation, our teams work closely with you to ensure safe and reliable supply. Our industrial and welding gases are filled to meet or exceed AWS A5.32 standards to ensure quality and consistency.

High Purity Specialty Gases

We supply high purity specialty gases and custom mixtures for labs, research facilities, universities, manufacturers, and other operations where precision and compliance are critical. Our advanced analytical equipment and experienced lab technicians ensure every product meets exact specifications. Offerings include EPA protocol gases, certified calibration standards, and custom blends backed by rigorous quality control.

Medical Gases

We are a full-service supplier of medical gases for hospitals, surgery centers, dental clinics, physician offices, and veterinary facilities. Every product we produce and deliver meets strict regulatory standards. Our team ensures safe handling, full compliance, and reliable service so you can focus on patient care.

Bulk & Micro-Bulk Gases

We provide customized gas supply solutions and full installation services—from site prep and piping to tank setup and delivery—for a safe, reliable supply. With a diverse sourcing network and our own transport fleet, we ensure uninterrupted delivery of key gases like nitrogen, oxygen, argon, carbon dioxide, helium, and hydrogen, even during product supply disruptions. We also support temporary applications with tube trailers and flexible delivery methods.

Beverage Gases

We specialize in beverage-grade carbon dioxide and nitrogen systems for bars, restaurants, breweries, coffee shops, and other hospitality venues. Our solutions support carbonation, draft service, cold brew, and other nitrogen applications, all backed by food-grade quality standards. With independent sourcing, our own transport fleet, and full system support including design, installation, and maintenance, we deliver reliable, uninterrupted supply from start to finish.

Dry Ice

Arc3 Gases produces dry ice at select locations to ensure local supply with consistent quality and freshness. We've invested in production and distribution capabilities to safely support applications like dry ice blasting, medical and cold storage, food service, and large industrial orders. Our dry ice is backed by responsive service to meet your needs.

Gas & Cylinder Capabilities

We operate six in-house gas production facilities, including a dedicated acetylene plant, giving us full control over supply, quality, and delivery across all gas packages, from cylinders and dewars to microbulk and bulk systems.

Cylinder Service Division

Our in-house cylinder team handles hydrotesting, ultrasonic examination, and cylinder requalification and painting. In addition, we have a team dedicated to liquid cylinder repair and refurbishment.

Cylinder Tracking: Advanced Cylinder Management (ACM)

Our closed-loop cylinder tracking system gives customers better assurance that their cylinder balance is accurate, providing visibility into rental assets, accurate billing, and proper credit for returned cylinders, even when they're returned by another company.

Bulk Supply & Transport Independence

With a diverse supply network and a fleet of company-owned trucks and transport trailers, we control product sourcing and delivery from start to finish. By owning the process, we ensure dependable service and the flexibility to respond quickly to customer needs. This commitment gives customers confidence that critical products will arrive safely and on time, even during industry-wide supply disruptions.

OUR CAPABILITIES

More than a supplier. A true partner.

This is a relationship business, built on trust, not transactions. We're in it for the long haul, supporting our customers with consistency, expertise, and follow-through.

Equipment Repair Services

We operate one of the region's most capable service networks, offering in-house and mobile repair for welders, saws, robotic systems, and other major equipment. Multiple service centers and teams provide fast turnaround and on-site support.

Inventory & Supply Chain Solutions

We help businesses take control of critical inventory with flexible vending programs and local inventory support. With a wide network of stocked retail stores and experienced teams, we ensure essential products are secure, tracked, and available when and where you need them.

Rental Services

Our rental fleet supports short-term projects, unplanned downtime, and temporary capacity needs. Available rental equipment includes welders, plasma cutters, wire feeders, and more.

Cryogenic Services

We deliver complete cryogenic solutions, including system design, installation, maintenance, and remote monitoring. Our team supports liquid, microbulk, and bulk systems with telemetry, inspections, and preventive service.

Welding Cost & Productivity Support

Our team helps improve welding performance through optimal equipment setup, process improvements, and consumable selection. We invest heavily in training and technical development to help our customers reduce waste and improve profitability.

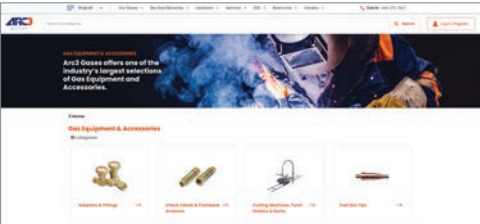

Custom Band Saw Blades

Our certified in-house Lenox weld centers produce custom blades built to spec and made in the USA. We provide fast turnaround and dependable performance for demanding cutting applications.

Automation & Cutting Solutions

We support automation solutions such as robot and cobot welding applications, laser and plasma cutting, beveling, forming, rolling, and material handling. By leveraging our automation expertise, we help deliver the right solutions for metal fabricators, enabling them to optimize operations and improve productivity.

E-Commerce

Our online platform makes it easy for customers to manage their account anytime, anywhere. They can shop for products, view and pay invoices, check cylinder balances, create reorder templates, and track order history—all with secure access and real-time visibility.
